- File transfer protocol (FTP) specification
- Data management
- Server maintenance
- Data storage
- Data back-up
- Security
- Data maintenance

The term of the agreement would run through June 30, 2023 and the City’s contribution for these services would be \$469.85. The City may use the data for any “legitimate governmental purpose,” such as for hard copy maps, printed reports, and manipulated and/or processed data files incorporating the parties’ data such that the original source data cannot be reconstructed.

### **Fiscal Impact:**

The City’s total contribution for services and data use would be \$4,592.49.

# 1. GEOVIEWER ONLINE

A top objective of the LPVCWD is to provide Geographical Information System (GIS) data to the casual user. Making GIS data available to casual users is very important. In many organizations the "non-GIS people" and/or novice computer users are the people who find the data to be most useful in carrying out their duties. Providing easy access to this information only improves the usefulness of the data and can save time and money for many types of organizations.

The GeoViewer approach to this objective is quite simple. We offer an easy-to-use, intuitive interface to Geographic Information Systems that provides the casual user with the ability to access the information they need with little or no formal training.

## The main objectives of the system include,

- Ability for non-GIS staff to use the system effectively with less than four hours of training.
- Provide access to interactive water atlas maps from staff desktops through web browser.
- Locate and view an area of interest anywhere within the service area.
- Provide secured access to only authorized users.
- Map updates are seamlessly delivered to system users without any lag time.
- Provide an extensible system that can be enhanced to provide broader functionality and adapt to future software and functionality enhancements.
- Enable direct integration with geographic data repositories, asset management information, linked image libraries, and other information associated with water system infrastructures.

## The GeoViewer was designed with the following assumptions in mind:

- Casual GIS users want fast, easy access to relevant information.
- Casual GIS users don't have the time or desire to learn about topology, Shapefiles, ARC/INFO, theories of GIS, etc.
- Casual GIS users don't want to have to add themes, assign colors, change theme properties, etc.

- Casual GIS users don't want to be bothered with the task of doing map composition. They would much rather has the ability to print their maps with a standardized template.
- Casual GIS users don't typically need to make large maps themselves and are perfectly happy printing an 8 1/2 by 11 map on a laser or ink jet printer. For the more advanced users, GeoViewer Online Supports multiple paper sizes that is only restriction is the clients printing device.
- Casual GIS users needs are simple -- They need GeoViewer
- The GeoViewer is a robust and easy to use Enterprise Geographic Information Interface. The GeoViewer is extremely flexible and can be tailored to any dataset.

We at Nobel Systems strongly believe that the functionality provided by GeoViewer will satisfy the needs of the District. The list of features provided by GeoViewer includes but not limited to:

**Standard GeoViewer Features:**

- Standard map navigation including pan, zoom in and zoom out, full extent
- Layer Display
- Creation of Spatial Bookmark
- Google Street View
- Vicinity map that can be used to set the extent of main map, pan the main map, and display the current extent of the main map.
- Property Search. Search by parcel number, situs address, or owner name.
- Supports ESRI Shapefiles, Coverages, Geodatabases, and CAD Drawings
- Also supports a wide variety of images including MrSid.
- Intuitive Select Toolbar. Select multiple features in multiple themes and:
- Find features within a specified distance, and generate mailing labels.
- Measure area and length
- Display contents of the selected set in a table format.
- Print map with a title, scale, and neat line.
- Link any number of layers to unlimited number of external databases
- Hyperlink scanned documents to features for easy retrieval.
- GPS location

### Selecting Features and obtaining information about them:

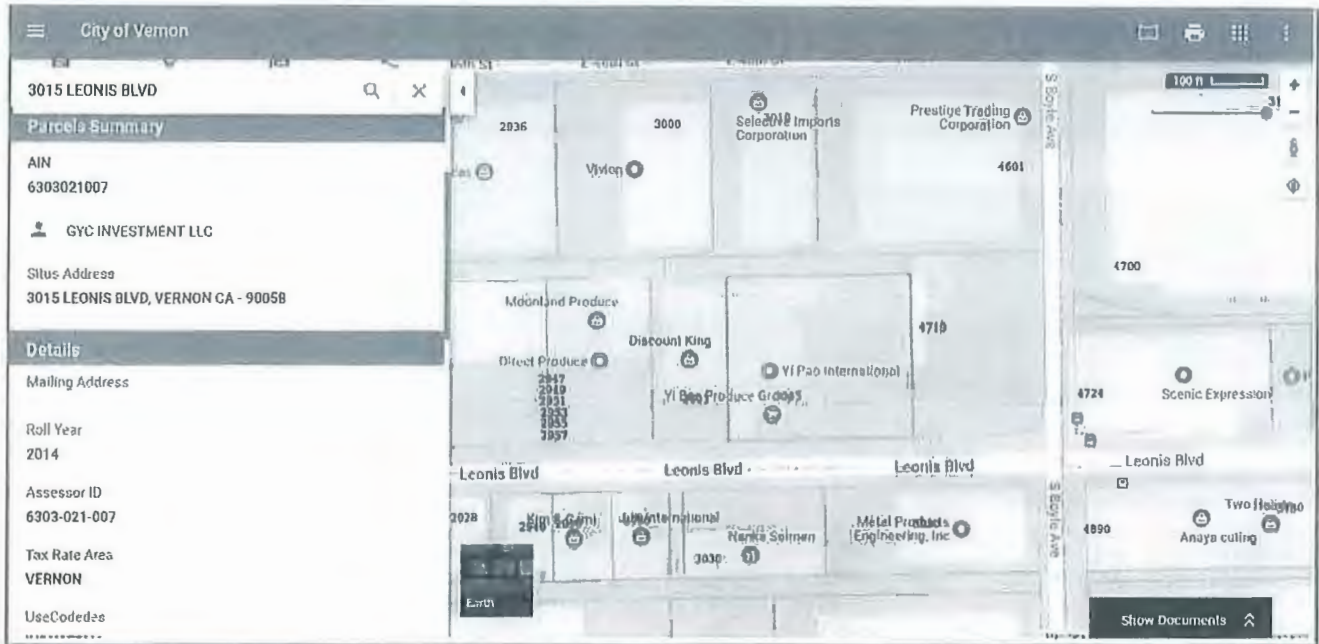

### Select by user-defined radial buffer surrounding selected parcel(s), box and Polygon:

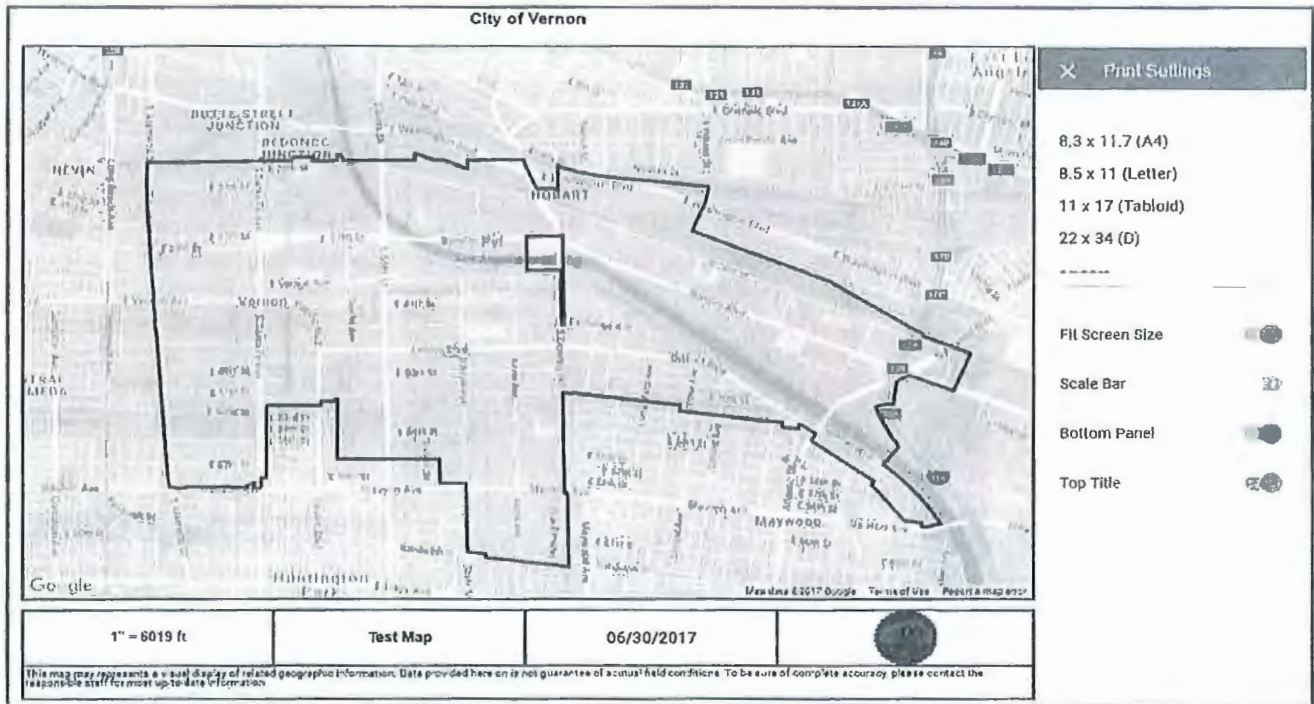

**Search Mechanism:**

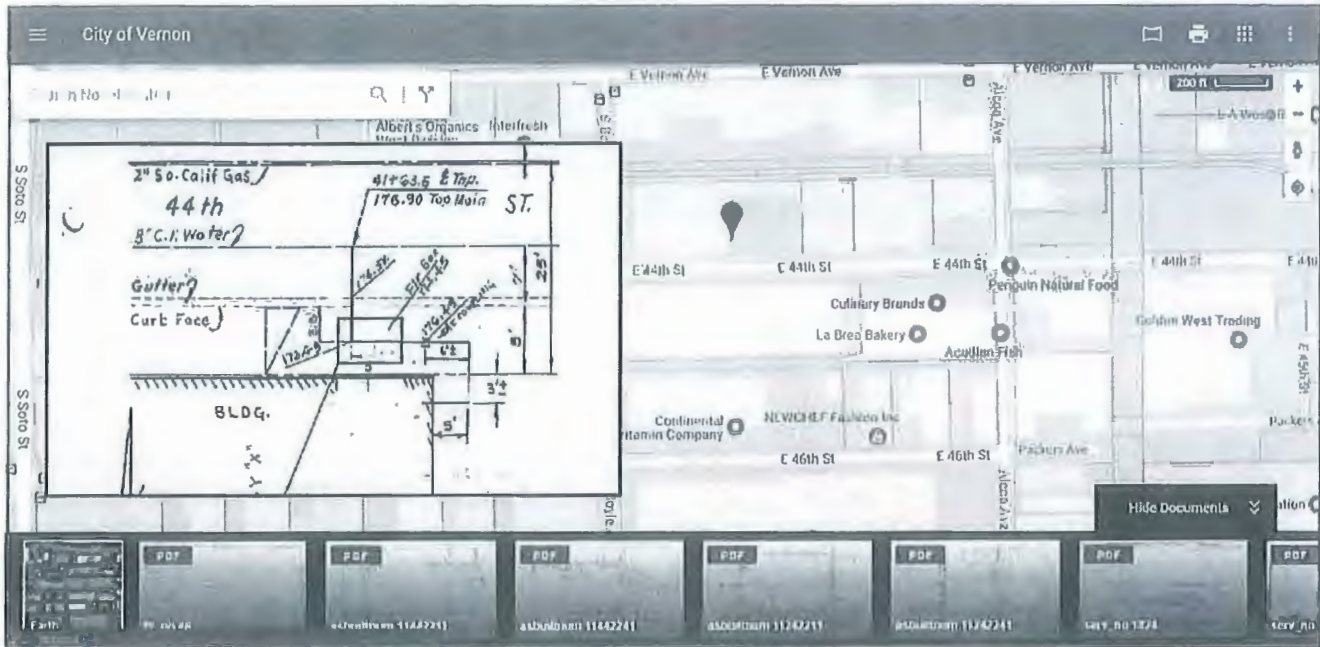

**Property Search:** Search by Parcel number, Situs Address, Owner name, Street intersection, Business name etc..

**Printing Maps:**

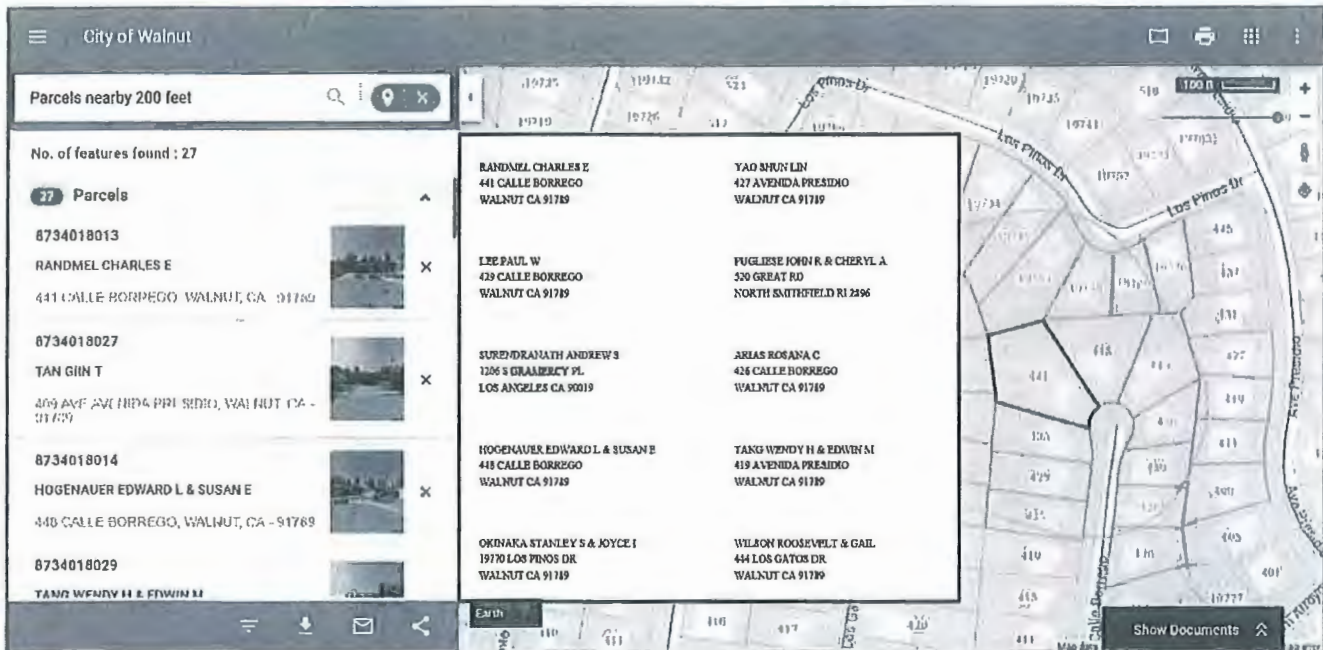

- Print maps using predefined templates containing title, scale, neat line, north arrow and disclaimer.
- Print map with standard printing options such as different orientations (portrait or landscape), various paper sizes.
- Add/Include basemap types such as Google Street View, Aerials etc.

Viewing Documents and Information behind maps:

Print Mailing Labels: Print Mailing labels (compatible to office product offerings from 3M, Avery and other label manufacturers)
